Worlds Largest Packaging Expo | INTERPACK 2023

Between the 4th and the 10th of May Interpack will make its long awaited return in Düsseldorf. After 6 years of absence, the exhibition is expected to be bigger than ever, with ground breaking innovations presented by the global leaders in packaging and processing.

As one of the leading suppliers of packaging and processing equipment across Australia and New Zealand, Automation & Packaging will be travelling to Germany to support their principals, who make up part of Automation & Packaging's portfolio of high quality packaging and processing equipment. At Interpack, Automation & Packaging's principals will be unveiling some brand new, never seen before innovations, as well as providing focus and support towards the topics of technology and sustainability in packaging and processing.

If you are planning on visiting INTERPACK, catch up with the Automation & Packaging team to explore the newest innovations. [Let us know \(click me\)](#) and we will arrange a time that suits.

What's on display Automation & Packaging's Partners

Clevertech | Hall 14, Booth D39

The Cleverttech group, based in the north of Italy, designs, manufactures and markets engineered front of line and end-of-line solutions. Cleverttech operates in a range of different sectors, including food & beverage, home care, pet food and personal care and have numerous systems operating with major consumer goods manufacturers worldwide including Australia and New Zealand.

Clevertech will be exhibiting its latest developments in palletising, depalletising, can and end making equipment and also demonstrating their new Cobot robots.

PACKAGING MACHINERY

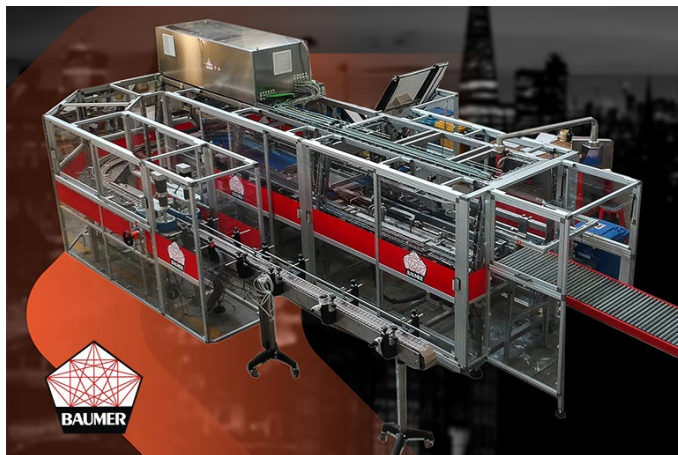

Ronchi | Hall 16, Booth D55

Ronchi Mario SpA are based in Gessate, Italy and are market leaders in the manufacture of Filling Machines, Capping Systems and Unscrambling and Orientating Systems for the cosmetic, chemical, pharmaceutical and food industries. Ronchi Mario S.p.A. will present new technical solutions that confirm their focus on innovation and advanced technology.

The booth will feature the latest generation of machines such as the modular robotic bottle unscrambler and the new robotic cap sorter in addition to the latest technologies and applications for automation and packaging processes.

A filling & Capping Monoblock, the machine that represents the heart of Ronchi's production, will also be on display.

Baumer | Hall 14, Booth C01

Baumer are based in Bologna Italy and have been manufacturing shrink wrapping machines and wraparound case packers since 1974 and supply machines to the food, beverage, dairy and personal care industries.

Baumer will feature their innovative Wrap-around case packer with the U-Shape Infeed System™

The U-Shape Infeed System™ is an innovative system patented by Baumer that reduces the footprint of the machine by over 50% and to process any type of product at high speed: oval, circular, square and rectangular.

Visit Baumer to discover the latest innovations designed for the food and beverage industries like the "Rouge" green packaging solution.

Zilli & Bellini | Hall 14, Booth C01

Zilli & Bellini is based in Parma, Italy and was founded in 1962, and is now one of the largest Italian manufacturers of filling equipment for the food industry.

Zilli & Bellini has a wide product range including telescopic fillers, vacuum fillers, piston fillers, gravity fillers, multifillers and seamers. Zilli & Bellini can also provide monoblock systems with either cappers or seamers.

The latest Zilli & Bellini Piston Filler will be on display as well as the other innovations designed for the food industry.

Steritech | Hall 5 Booth C41

Steritech are based in Alsace in France and have been a world leader in thermal processing innovation for over 30 years. At Steritech, they are always seeking new ideas to minimise the ecological impact. That's why they've developed innovative solutions that recover energy and water used by their retorts and repurpose them for other cycles or functions in the factory.

Steritech will present their latest innovations about retorts and, in particular, their energy recycling systems, designed to reduce the ecological impact of equipment.

Don't miss the star of their booth at Interpack! Goût'stave, the small electric retort!

Discover how to save more resources and water thanks to Steritech's latest recovery and recycling system.

We look forward to seeing you at INTERPACK 2023!
